2022

Feb. 12 choose the API we will use for the project. We decided to use a currency exchange API at exchange-rate.host. Begin to test if the API can work properly.

Feb. 13 finish the wrap function for time series data. Finish a function to return the dataframe of the exchange rate in a time period for a certain currency. and another function to draw a plot for the currency change of 2 currency in a certain time period.
